

WHO SHOULD CONSIDER GETTING LSS CERTIFIED?

Those leading or actively involved in process improvement activities

Those managing projects in any discipline

Those who are responsible for ensuring and maintaining quality standards

Barrington Consulting's primary focus is working with organizations to help strategize, plan, and implement change through business and information technology consulting services. Headquartered in Halifax, Nova Scotia, Barrington was founded in 2004 and has grown to over 50 professional full time consultants delivering exceptional services to its clients.

"This is an excellent program that can be used by any organization ready to embrace positive, effective and efficient change. It teaches a highly successful and proven process improvement methodology that includes an extensive set of practical tools and one-on-one coaching. I am most excited that the skills, methodology and tools can be applied immediately!"

LEAN  PROJECT DELIVERY & TRAINING

- Work Balancing
- Identifying and Determining
- Removing Waste
- Root Cause
- Value Stream Mapping
- Data Analysis
- Problem Solving
- Leading Teams
- AND MORE

Lean Six Sigma (LSS) is a blend of proven process improvement methods. Lean focuses on removing waste and non-value added steps from a process and Six Sigma focuses on the stability and capability of a process to consistently deliver the highest quality product or service.

Why Lean Six Sigma?

Application of the LSS methodology has been globally recognized for realizing significant cost reduction, increased efficiency and quality.

LSS can be applied in ALL business areas from administration to delivery of services.

Lean Six Sigma

Sample Applications:

- Reduce Lead Time in the recruiting process
- Address Call Centre backlog
- Improve the quality of training
- Develop effective staffing models
- Smooth out ordering of products
- Reduce cost/time required to issue permits, licences and approvals
- Level out workload between staff
- Establish Key Performance Indicators
- Create a Process Management Board

Barrington Consulting helps you learn and apply Lean Six Sigma

Working closely with a LSS Master Black Belt, Barrington has designed and delivers a rigorous LSS program which will carry credibility within the industry and ensure knowledgeable green and black belts who can effectively administer LSS methodologies.

The LSS tools and skills are able to be transferred immediately into your organization, helping to identify and solve service and/or quality issues, realizing quantifiable and sustainable improvement results.

Green and Black Belt Training

Key Learning Objectives:

- Understand and apply the DMAIC approach within the disciplines of LSS
- Identify and address root causes for failures or inefficiencies
- Identify and remove non-value added work
- Learn and apply Change and Stakeholder Management
- Learn how to obtain results quickly and drive sustainable improvement
- Learn and apply tools to control and sustain improvements

Barrington Consulting applies Lean Six Sigma methodology on client engagements.

Aside from LSS certification, many of our practitioners hold the Project Management Professional (PMP) designation and bring extensive experience within both public and private sector environments in all aspects of the project life cycle. This combination ensures significant and sustainable results.

Lean Six Sigma enriches the toolbox for Project Management, Business Analysis, planning, design, implementation and sustainability.

Process Improvement & Project Delivery

Effective Process Management:

- Connecting your processes to the rest of the organization
- Mapping out your processes to identify potential efficiency gains and set future metrics
- Understanding and supporting your team in managing the key essential drivers of your organizational processes
